V.	Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement				
1.	Statement Novelty (N)	Claims	1-187	YES	
		Claims		NO	
	Inventive step (IS)	Claims		YES	
		Claims	1-187	NO	
	Industrial applicability (IA)	Claims	1-187	YES	
		Claims		NO	
Cita	ations and explanations				

The following documents have been cited in the Search Report:

D1: BR 200001122 A - WPI-abstract

D2: WO 99/60138 A2 D3: US 5866374 A D4: US 5585271 A

Claims 1-187 concern genetically modified microorganisms which have promoter regulated flocculation genes. The flocculation is regulated by the environment of the cells. Further, the claims concern fermentation processes using such microorganisms, plamids, vectors and expression cassettes. The claims are not restricted to specific microorganisms, fermentation processes using such microorganisms, plamids, vectors and expression cassettes. The specification just concerns desired products and desired effects. There are not any examples which support the very broad claims.

Flocculating microorganims which are derived from non-flocculating strains and flocculating genes with their promoters are disclosed in D1. D2 concerns methods of regulating cell flocculation whereby the flocculation is induced by the growth medium. A person skilled in the art will take the information and technical features from D1 and D2 and come to the subject-matters of the claims 1-187.

D3 discloses the transformation of yeasts with Lg-FL01 DNA which enables the production of yeast strains in which flocculability has been introduced or enhanced. Also this document reveals the idea that flocculation is inducible with biotechnological methods. The flocculating is regulated by the medium. D4 reveals a further agglutination gene and further genetic tools for the insertion of such a gene into a cell. It is obvious from D3 and D4 that it should be possible to bring different agglutination genes in microorganism. Thus, the subject-matters of claims 1-187 are obvious. Industrial applicability is given for the subject-matters of all claims.
